

MSC LIRICA
STATEMENT OF CORRECTIVE ACTION
Port Everglades - January 26, 2004. Score - 98

No.	Ref. No	Area/inspection result/Corrective Action
1	*	Child Activity Center
	Inspection Result	A Child Sized insert was needed for the toilet in the Children's Activity Center
	Corrective Action	An appropriate child-size insert has been provided as required
2	*	Main Galley Deck 5 Potwash
	Inspection Result	One large pot was stored as clean and soiled with food debris
	Corrective Action	Tight quality controls are in place to avoid a recurrence of this item.
3	*	Main Galley, Deck 5
	Inspection Result	One employee was noticed coughing and did not wash his hands. The employee was informed and the importance of handwashing was emphasized
	Corrective Action	MSC Standard Procedures preclude this behavior. Personnel have focused on this single issue which will not be repeated.
4	*	Crew Galley, Deck 4
	Inspection Result	A carbonized residue was noted on the fryer coils of the fryer.
	Corrective Action	MSC Standard Procedures have been modified to include a checkpoint to cover fryer coils. The matter has been corrected.
5	22	Crew Galley warewash
	Inspection Result	The final rinse arm had three spray nozzles that were clogged while the warewasher was in active use.
	Corrective Action	This was a human failure which has not been rectified. Physical checking of all nozzles has now been included in the checklist for Warewash machinery cleaning.
6	*	Preparation area - Bakery - Deck 4
	Inspection Result	Water was noted between the belt and the metal support on the dough roller.
	Corrective Action	As a result of this problem, procedures for cleaning the Dough Sheeter have been changed to include total air-drying of all components after dismantling for cleaning. The problem has not recurred, and is checked after every use.
7	*	Preparation area - Butchery - Deck 4
	Inspection Result	Some cutting boards were scratched and pitted.
	Corrective Action	All cutting boards in every department have subsequently been inspected. Most have been successfully resurfaced, and all those with damage that precludes resurfacing have been replaced. A checklist has been introduced to discard uncleanable and un-re-surfactable boards.
